OVERVIEW

MPH@GW is the online Master of Public Health program delivered online by the Milken Institute School of Public Health at the George Washington University. This innovative program enables aspiring public health leaders to take the next step in their career without having to relocate.

THE MILKEN INSTITUTE SCHOOL OF PUBLIC HEALTH

Located in Washington, D.C. — the nation’s hub for health policy — the Milken Institute School of Public Health at the George Washington University is a top-ranked school of public health. GW’s expert faculty conduct cutting-edge research and engage in one-on-one mentorships with students.

PROGRAM FEATURES

Choose From Three Program Tracks

MPH@GW offers three program tracks. You can earn your MPH in as little as 12 months with our accelerated track. Students who are interested in an accelerated option that is slightly less demanding can complete the degree in the 18-month program track. The standard program can be completed in as little as two years.

Customize Your Curriculum

Tailor your learning experience to your interests. Select one of the following optional focus areas.

- Health Policy: Improve public health services domestically and globally by advancing innovative and effective health policy education, research and service.
- Health Communication: Advance public health objectives by using communication and marketing as strategic tools to influence people, places and environmental conditions.
- Program Planning and Evaluation: Develop, improve and critique public health program plans and evaluations, and become a responsible and productive public health professional.
- Global Health: Tackle important global health issues by contributing to the development, implementation and evaluation of policies at the local, national, regional and international levels.

Advance Your Career With MPH@GW

With an MPH from GW, you can pursue a range of public health interests. For example, you can:

- Tackle domestic health issues by influencing health policy on the hill in Washington, D.C.
- Travel to underserved areas and improve public health in small communities.
- Work to spread the word about health related initiatives in the local, state, federal or global arena by working in public health communications.
- Plan and steer the course of public health initiatives as a program manager.
